

Cotton Pre-treatment Liquid

Epson[®] SureColor[®] F-Series Direct-to-Garment

Garment pretreatment concentrate for cellulose-based garments (i.e. cotton, linen, bamboo) and blends that produces bold prints with bright whites and vivid colors. The pretreatment liquid has minimal hand-feel and leaves little-to-no discoloration on garments. Epson Pre-Treatment Fluid is ECO-PASSPORT Certified by OEKO-TEX, an international safety standard in the textile industry. It certifies Epson Pre-treatment fluid is safe for adults and children, including babies. Pre-treatment application to a garment is required prior to use of UltraChrome DG White Ink and should be mixed 1-to-2 with distilled water for use on dark garments (White ink applied) to yield 60 liters of fluid. It is not required for use on light garments where white ink is not applied (CMKY ink only), however it can be used for slight increase in vibrancy and print detail by mixing 1-to-9 with distilled water to yield 200 liters of fluid. It is recommended to apply the pre-treatment fluid using a pre-treatment machine or airless sprayer.

Features/Benefits:

- Minimal hand-feel with little-to-no garment discoloration
- High wash-fastness durability
- For use on both dark garments with white ink, and light garments without white ink applied
- Simple 1-step curing process compatible with heat press and conveyor dryers
- Optimized for Epson UltraChrome DG inks used with the SureColor F2000 and F2100 Direct-to-Garment printers
- OEKO-TEX ECO-PASSPORT certified
